

# Problem Set 1

This is Problem Set 1 (only STL Containers). Some of these are pretty tough, and I don't expect you to solve all of them on your own, but what I want you all to do is to give a 20 - 30 minutes trial of how to solve. If you are able to find solution, good to go, implement it and get that satisfying AC. Even if you aren't able to solve it entirely, discuss on channel with mentors and others about your approach and try to find correct solution and then implement on your own.

## **STL Containers:**
